

Method	Mean Rama Favored	Median Rama Favored	Mean Rama Outlier	Median Rama Outlier	Mean Clashscore	N Successful
La-Proteina	0.9944	0.9949	0.000204	0.000000	0.00	50
ReQFlow	0.9781	0.9798	0.004564	0.005100	0.00	50

Summary: La-Proteina demonstrates superior Ramachandran quality with higher mean favored fraction (0.9944 vs 0.9781) and lower outlier fraction (0.0002 vs 0.0046) compared to ReQFlow. All 100 generated backbones validated successfully. Clashscore analysis reveals 0 van der Waals clashes in all structures after hydrogen addition via MolProbity preprocessing.
